

Tree Planting information packet

Thanks for considering
Cherokee Tree Care for your planting
project!

Why hire an arborist to plant your tree?

- An initial consultation with an expert to determine proper tree selection for your space. "Right tree, Right place" is vital to longevity of life for your tree.
- An arborist will be aware of pest and disease susceptibility and which trees do well in our area.
- Improper planting can result in tree death. An arborist will ensure planting is done properly to ANSI standards to set up your new tree for success.
- Expert guidance on how to best care for your tree after planting.

Want us to meet you at the nursery to help you select your tree or take care of the selection process for you?

Not a problem! An additional consultation or plant finding fee is \$75

Planting Procedure

We know that adding a new tree to your property is a big investment. That is why we want to set you up for success!

1

The first step is to schedule a free consultation on your property with an arborist. We will look at your space and give you our recommendations for the space you have and what to look for in a tree.

2

Next, we want you to choose the tree you love! We have a list of recommended local nurseries in this packet to purchase your tree. Some of which offer a 1-year warranty.

3

After your tree is purchased, we will take over from there! We will place a dig-rite ticket for your property to locate any underground utilities, pick up the tree from the nursery and deliver it on planting day. The tree will be planted by an Arborist to ANSI standards with a mulch ring. We will leave you with care instructions for your new tree.

4

The last step is to relax knowing the hard work is done by professionals and enjoy your new planting!

PLANTING

PRICING

Pricing for planting jobs is based on size and type of nursery stock selected.

Container Trees

5-7 gallon and/or under 10' tall	\$200
----------------------------------	-------

10-15 gallon and/or 10-15' tall	\$250
---------------------------------	-------

20-30 gallon and/or 15-20' tall	\$325
---------------------------------	-------

We do not recommend selecting trees larger than this.

Balled & Burlapped Trees

Under 1" caliper and/or under 10' tall	\$250
--	-------

1-1.5" caliper and/or 10-15' tall	\$325
-----------------------------------	-------

1.75-2" caliper and/or 15-20' tall	\$425
------------------------------------	-------

We do not recommend selecting trees larger than this.

417-725-3223

Site One
417-881-6675

Wickman's Garden
417-862-3707

Willow Green Acres
417-862-3707

****Additional consultations at nurseries or having us select the tree for you are available options for a \$75 fee.**

Recommended Tree List

We have compiled a list of trees that we have found do well in our area. We recommend starting with smaller, container trees. These tend to have more of a root system and establish quicker than larger trees or balled and burlapped trees that don't have much of a root system to begin with.

When selecting a tree from a nursery, look for one that is free from damage on the and has one central stem for the best structure.

Deciduous Shade Trees

- Shantung Maple
- Sugar Maple
- 'Crimson King'
- Norway Maple
- Black Tupelo
- Lacebark Elm
- Swamp White Oak
